

DISCONE ANTENNA

30-150 MHz

3 Dbi Gain

General: This Discone Antenna is rugged all weather model, uses highclass chrome plated aluminium material and does not require any field tuning or adjustments. The antenna when packed, comes with Cone and Disc elements removed from the antenna body for ease of packing and shipment. The compact size of antenna allows easy handling and specially designed mounting hardware results in fast installation.

The antenna is designed to operate at D.C. ground.

ELECTRICAL DATA

Frequency Range (MHz)	30 -150
Gain (dBi) Bandwidth (MHz.)	3dbi Interband
Polarization Input	Vertical.
Impedance(Ohms)	50
Radiation Pattern RF	Omni
PowerHandlingCapacity	(Watts)100
Input Termination	N-Female
Lightning Protection	DirectGround

MECHANICAL DATA

Materials	Aluminum
Mounting HW	Stainless
Weight	11kg
Wind Rating(KMPH)	120

- Please Note:**
1. Specifications are subject to change without any notice.
 2. Customized in-band and out of band versions are available on request.
