

## TELESCOPIC MAST

Attribute	Description
Item Name	Telescopic Mast (or Telescopic Antenna Rod)
Type	Multi-section, extendable cylindrical mast
Material	Likely aluminum or stainless steel (main body); brass or gold-plated connector
Color	Silver (shaft), Gold (bottom threaded tip)
Structure	Telescoping tube with multiple nested sections
Top End	Rounded or capped knob (possibly for grip or mechanical stop)
Bottom End	Threaded brass connector (for screwing into device or mount)
Operation	Manually extendable and collapsible
Typical Use	RF measurements, test equipment extension, portable antenna support
Connection Type	Male threaded screw (possibly M4 or similar)
