

## Low-power handheld Technical Specifications

**Frequencies: 1.5/2.4/5.8 GHz**

**Product Model Number: ST-008-1050-4-7SY**

| Technical Specifications |                                                                                  |  |  |
|--------------------------|----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|--|
| Frequency Range          | 1560-1610/2*2400-2500/5725-5850MHz                                               |                                                                                     |  |
| transmitting power       | 10W                                                                              |                                                                                     |  |
| Electricity Usage Method | Built-in battery: 12V (50Ah) / External charger: (220V)                          |                                                                                     |  |
| weight                   | 3.45Kg                                                                           |                                                                                     |  |
| Antenna beamwidth        | 260*260                                                                          |                                                                                     |  |
| manner of packing        | Specialized fire-resistant materials toolbox + external aviation-grade container |                                                                                     |  |
