ABOUT US

Leading R F & Communication Technology Solutions

Synergy Telecom Pvt. Ltd. is an Indian technology company specializing in the design, development, and manufacturing of advanced RF and communication systems. We deliver reliable, high-performance solutions tailored to the needs of defense, homeland security, government organizations, and critical infrastructure.

In light of the escalating drone threats and the critical need for robust airspace security, I am reaching out to introduce our comprehensive range of **Anti-Drone Jamming Solutions**.

We specialize in indigenous, high-performance RF Jamming Modules and specialized antenna systems designed for tactical defence sector.

Our Expertise

RF & Microwave System Design

High-Power RF Amplifiers

Anti-Drone Detection & RF Jamming Systems

Communication & Signal Processing Solutions

Custom RF Engineering & System Integration

WHAT IS AN ANTI-DRONE SYSTEM? (COUNTER-UAS)

AN ANTI-DRONE SYSTEM (COUNTER-UNMANNED AIRCRAFT SYSTEM) IS A MULTI-LAYER SECURITY SYSTEM DESIGNED TO PROTECT RESTRICTED AIRSPACE FROM UNAUTHORIZED OR HOSTILE DRONES.

KEY IDEA:

 AN ANTI-DRONE SYSTEM IS NOT A SINGLE DEVICE, BUT AN INTEGRATED NETWORK OF DETECTION, INTELLIGENCE, AND DEFENSE SYSTEMS WORKING TOGETHER.

FLOW (BOTTOM LINE FOR SLIDE):

DRONE → DETECT → TRACK → IDENTIFY → NEUTRALIZE

KEY FEATURES & TECHNICAL SPECIFICATIONS

KEY FEATURES

- ✓ HIGH-GAIN OMNI ANTENNAS (WIDE COVERAGE)
- ✓ INDEPENDENT BAND CONTROL
- ✓ INTELLIGENT ACTIVE COOLING SYSTEM
- ✓ RUGGED & DURABLE FIELD-READY DESIGN
- ✓ OVER-TEMPERATURE & OVER-CURRENT PROTECTION
- ✓ RECHARGEABLE LITHIUM BATTERY / AC CHARGER
- ✓ 1-2 HOURS BATTERY BACKUP

APPLICATION AREAS

-  MILITARY & DEFENCE
-  BORDER PROTECTION
-  CRITICAL INFRASTRUCTURE
-  VIP SECURITY
-  COUNTER-DRONE SECURITY OPERATIONS
-  FIELD OPERATIONS

FREQUENCY COVERAGE & POWER OPTIONS

SUPPORTED FREQUENCY BANDS

380–470 MHz (UHF Communication / Tactical Links)
600–750 MHz (Long Range RF Communication)
860–930 MHz (ISM / IoT / Control Signals)
1170–1280 MHz (Navigation / Surveillance Links)
1560–1620 MHz (GNSS / GPS Navigation Systems)
2380–2500 MHz (Wi-Fi / Data Links / Drone Control Band)
5150–5250 MHz (High-Speed Data / Wi-Fi / Video Transmission)
5720–5860 MHz (5.8 GHz Drone Control / Video Downlink)

AVAILABLE RF OUTPUT POWER

10W
20W
30W
50W
150W
200W

Customization

- Custom Frequency Bands
- Custom Output Power
- Modular & Scalable Design
