

Fully-Anechoic Chamber Key Features

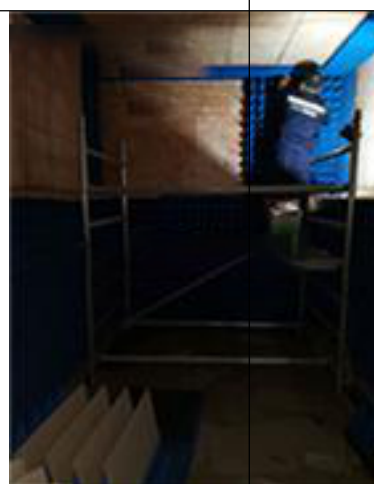

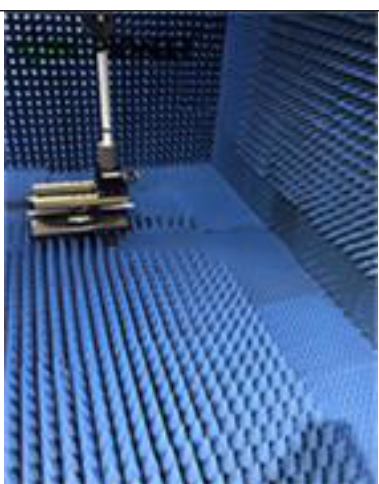

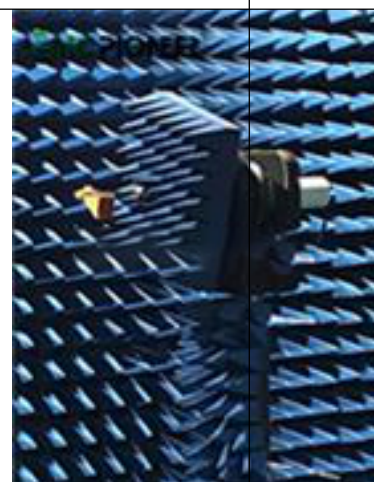

Fully-anechoic Room (FAR)

Fully-anechoic chamber: Rooms without any reflection at all. (walls, ceiling and floor with foam absorber)

SYNERGY TELECOM PVT LTD design, manufacture and build the Fully-Anechoic Chamber.

- Modular pan type panel design enables easy site changes or upgrading
- Tailored to suit your test part and the test standards that are relevant to your needs
- Available various chamber size based on individual requirements

Anechoic Chamber Project Photo Review:

Fully-Anechoic Chamber Request Form

Customer information:

Company Name: _____

Address: _____

Tel: _____

Email: _____

Website: _____

Please fill in the form and send back to us, our engineer will offer the available project design as per your requirements.

1. External dimension (Unit: Meter): _____ (Length*Width*Height)

Inner dimension (Unit: Meter): _____ (Length*Width*Height)

2. Testing Application: _____

A: Antenna B: RCS C: Radar D: Others (Please let us know the details)

What's the testing frequency of EUT? _____

3. Shielding Frequency Range and Shielding Performance: _____

(For example: 100dB@30MHz~18GHz)

4. RF Shielded Door

(1) Operation: _____

A: Manual door B: Pneumatic door C: Electric door E: Others

(2) Door Type: _____

A: Swing door B: Sliding door C: Double Leaf door

(3) Door opening size: _____ (Width*Height)

A: 1000x2000mm or 900x2100mm (Standard door opening Size)

B: Special size: _____ (Please let us know your requirement door size)

5. Ventilation Vent

(1) Size: _____ (Length*Width)

A: 300*300mm B: 300*600mm C: 450*450mm D: 600*600mm E: Other _____

(2) Quantity: How many pieces ventilation vents you need? _____

6. EMI Filter

(1) Power Line Filter

A: DC or single phase or three phases? _____

What's the electronic current? _____

(For example: 100VDC 32 Amp or Single phase 32Amp or.....?)

B: How many pieces power line filter you need? _____

(2) Signal Line Filter

A: Usage: _____

(For example: Used for fire alarm systems, air conditioning systems or?)

B. How many wires of signal line filter you need? _____

(For example: 2 wires or 4 wires or ...?)

7. Penetration Panel

(1) Penetration Panel Size: _____ (Length * Width)

Standard penetration panel size 300x300mm or 400x400mm, If you need special size, please let us know.

(2) RF connector: _____ (For example: 2pcs*SMA ...)

Which type RF connector you need? (SMA, N, BNC or.....)and what's quantity of each type connectors you need? _____

8. Do you need installation service? _____

A: Yes(install place?start time?)

B: No

9. Do you have budget for this project? _____

A: Yes (Please let us know your budget, we could design the chamber based on your budget) B: No

10.If you have special requirement, please let us know:
