

## OFFER SHEET

|                  |                                                    |
|------------------|----------------------------------------------------|
| <b>Name</b>      | Semi-automatic stripping machine for coaxial cable |
| <b>Model No.</b> | SR-6806(OD:0.81-6.99mm)                            |
| <b>EXW (USD)</b> |                                                    |

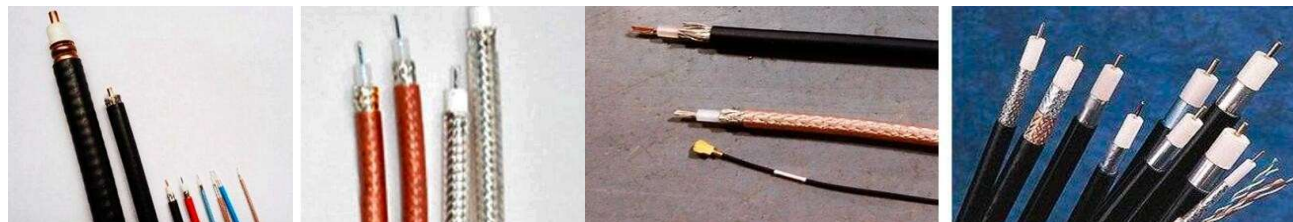

## Technical Specifications and Parameters

|                                                                                   |                       |                                                |
|-----------------------------------------------------------------------------------|-----------------------|------------------------------------------------|
|  | Model                 | SR-6806                                        |
|                                                                                   | Dimensions            | 600*185*280mm                                  |
|                                                                                   | Weight                | 28kg                                           |
|                                                                                   | Display Mode          | English /Chinese interface touch panel display |
|                                                                                   | Power Supply          | AC220V, 50/60HZ                                |
|                                                                                   | Cutting Depth         | 0.01mm                                         |
|                                                                                   | Max. Stripping Length | 48mm                                           |
|                                                                                   | Max. Stripping Layer  | 9 Layers                                       |
|                                                                                   | Working Efficiency    | 600~1200pcs                                    |
|                                                                                   | Power Rating          | 400W                                           |
|                                                                                   | Wire Diameter         | 0.81~6.99mm                                    |

## Feature

- 1 Convenient operation, LCD display:** Menu-style dialogue control system, easy to set each function, can save up to 100 kinds of processing data, can be manually, inductive system, safe and simple
- 2 Advanced knife holder:** For coaxial and single wire, advanced rotary tool holder for precision and speed
- 3 High quality blades:** Imported Swiss tungsten steel blade, high-precision grinding process to ensure cutting accuracy and blade life, the maximum peeling layer, up to 9 layers.

## Finished Sample

## Terms

**Lead Time:** 5~10 days once got confirmed deposit and confirmed all order detail and sample provided.

**Payment Terms:** TT, 0% deposit, balance before shipment. EXW, FOB, CIF, CFR price can be optional.

## Relative cable machine for reference, stripping machine, twisting machine
