

## 10-6000MHz Limiter SMA Female

|                                       |                         |                          |
|---------------------------------------|-------------------------|--------------------------|
| Part Number                           | ST-10-6G-SMAF           |                          |
| Operating Frequency ( MHz )           | 10-6000                 |                          |
| Impedance ( Ohm )                     | 50                      |                          |
| Input VSWR                            | $\leq 1.35$             |                          |
| Output VSWR                           | $\leq 1.45$             |                          |
| Insert loss(dB)                       | $\leq 0.8$ @10-3000MHZ  | $\leq 1.5$ @3001-6000MHZ |
| 1dB Compression Point Power ( dB )    | 10/20/30/36             |                          |
| Interface                             | SMA Female - SMA Female |                          |
| Operating Temperature ( °C )          | -20 ~ + 80              |                          |
| Application                           | Indoor                  |                          |
| Dimension (mm)(L*W*H, excl connector) | 63*28*13                |                          |
| ROHS Compliance                       | Yes                     |                          |
