

RF indicators

Test item		Metric	Unit	Remarks
Frequency range		5725-5850	MHz	
Working voltage		32	V	
Mix Output Power		51.8	dBm	≤11
Standard Input Power		7-10	dBm	
Working efficiency		43	%	Typical work efficiency
Output port standing wave ratio		≤1.50		
High and low temperature test	Working environment temperature (°C)	-40 ~ +55	°C	
	Power stability	1.5	dB	-20°C ~ +75°C
Power supply requirements		≥14A		Maximum Power Output
485 Monitoring		Support real-time temperature reporting, output power reporting, and working current reporting; Equipped with temperature protection, overcurrent protection, and standing		
Control Interface		7w2	Other pin: NC 6pin GND 7pin VCC 4pin 485B 5pin 485A 2pin PA_EN (High on low off, with a delay of less than 2us)	

Power Supply Interface	through-hole	32v
Vibration Requirements		Meet the requirements of military vehicle mounted equipment
Output Connector	N	Female
Input Connector	SMA	Female
Size	170×94×26.5mm	Excluding interfaces N

Installation Dimensions
